This technical drawing shows the rear panel of the device. It features a large central rectangular area with a grid of ports, including two RJ45 ports, two USB ports, and two FireWire ports. Below this area are two large circular ports, likely for audio or video. To the right, there is a section with three status LEDs (red, green, and green) and a small display. The entire panel is enclosed in a metal frame with mounting holes.

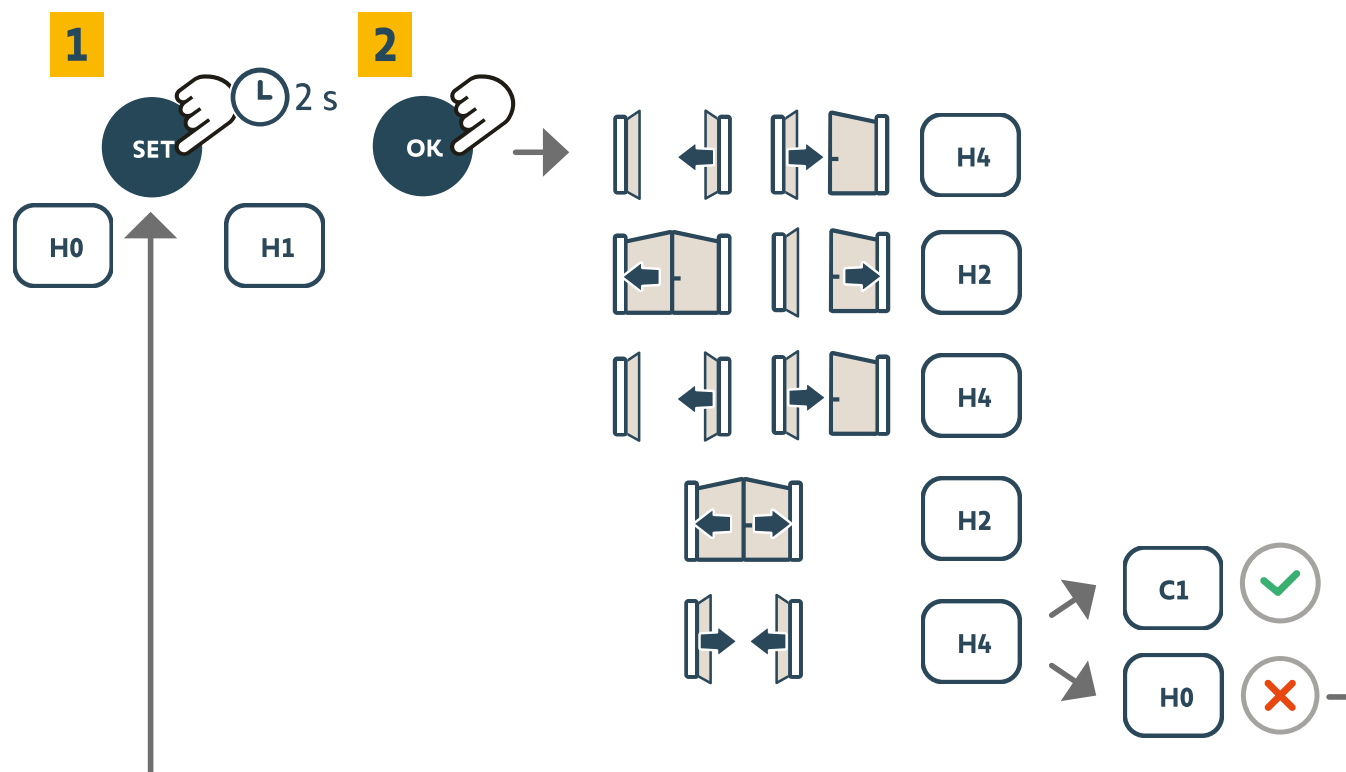

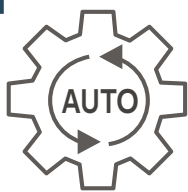

The diagram illustrates the correct and incorrect ways to use the H2 and H4 buttons on the remote control.

Correct Usage (Top Row): Pressing the **H2** button (indicated by a hand pressing the **+** button) results in a green checkmark and the **AUTO** mode being activated (indicated by a gear icon with **AUTO** inside).

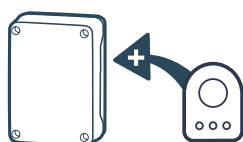

Incorrect Usage (Bottom Row): Pressing the **H4** button (indicated by a hand pressing the **-** button) results in a red X and the **M1** and **M2** modes being activated (indicated by the **M1** and **M2** icons).

The text **or/ou** is placed between the two rows, indicating that the correct usage is either pressing the **H2** button or the **+** button.
